

KITTENS

Last summer we found two little kittens. They were by the road without their Mom. They were very cute but very small. They were so little they could not eat alone. We took them home.

We used little bottle to give them milk. When they grew they started to discover the world. They liked to play with our big cats. They did many funny things, they ran

and chased their tails and liked to play with the curtains. They played with the little soft ball and carried it in their mouth like dogs.

We had lots of fun with them. They slept with me in bed and played with my hair. We named kitty Alicka, she was black and we called tomcat Riško, he was brown with stripes like a tiger.

Then we found for them new home. Now they live in the family in the village near Munich. I'm little bit sad that they are so far. But I'm already looking forward when we will find some other small kittens and I will help to look after them.
